Lab-6 FCFS AND SJF

Name – Vinay Santosh Menon Registration Number - 20BAI1103

TASK:

To write a C code for demonstrating FCFS and SJF with and without Arrival Time.

FCFS Without Arrival Time:

```
#include <stdio.h>
int waitingtime(int proc_id[], int n,
int burst_time[], int wait_time[])
  wait_time[0] = 0;
  for (int i = 1; i < n; i++)
  wait_time[i] = burst_time[i-1] + wait_time[i-1] ;
   return 0;
int turnaroundtime( int proc_id[], int n,
int burst_time[], int wait_time[], int tat[])
  int i:
   for (i = 0; i < n; i++)
   tat[i] = burst_time[i] + wait_time[i];
  return 0;
int avgtime( int proc_id[], int n, int burst_time[])
  int wait_time[100], tat[100], total_wt = 0, total_tat = 0;
  int i;
  waitingtime(proc_id, n, burst_time, wait_time);
   turnaroundtime(proc_id, n, burst_time, wait_time, tat);
   printf("Processes| Burst_time| Waiting_time| Turn_around \n");
   for ( i=0; i<n; i++)
      total wt = total wt + wait time[i];
      total_tat = total_tat + tat[i];
      printf(" %d\t
                      %d\t\t %d
                                           %d\n", i+1, burst time[i],
wait_time[i], tat[i]);
   printf("Average waiting time = %f\n", (float)total_wt / (float)n);
   printf("Average turn around time = %f\n", (float)total_tat / (float)n);
   return 0;
int main()
   int proc_id[100];
  int burst_time[100];
  int n;
  printf("no of processes : ");
   scanf("%d",&n);
   for(int i=0;i<n;i++)</pre>
   {
        printf("Process id: ");
```

```
scanf("%d",&proc_id[i]);
    printf("burst time: ");
    scanf("%d",&burst_time[i]);
}
avgtime(proc_id, n, burst_time);
return 0;
}
```
